Connecting cameras using WPS: you will need access to the camera and your router.

Connecting cameras using Wi-Fi: you will need access to the ClareVision+ App, camera, and your Wi-Fi network.

In order to access live camera video and recorded footage from anywhere in the world, you must first setup a Cloud P2P account.

Installation Option 1: WPS (Wireless Protected Setup)

Preferred Setup Method (Routers with WPS)

Connecting cameras using WPS: you will need access to the camera and your router.

1. Connect the camera to the power supply. (within 10 ft of the router)
2. Press the WPS button on your router.
3. Within 120 seconds, press and hold the WPS/reset button on the back of the camera for 2 seconds.
4. LED on the camera will turn solid blue when connected to the network.
5. To view live camera footage, proceed to Cloud P2P setup.

The camera can be unplugged and moved to a different location after setup. It will automatically reconnect to the network.

Installation Option 2: Wi-Fi Setup - iOS Only*

Alternate Setup Method (Routers without WPS)

Connecting cameras using Wi-Fi: you will need access to the ClareVision+ App, camera, and your Wi-Fi network.

1. Connect the camera to the power supply. (within 10 ft of the router)
2. Press the WPS button on your router.
3. Within 120 seconds, press and hold the WPS/reset button on the back of the camera for 2 seconds.
4. LED on the camera will turn solid blue when connected to the network.
5. To view live camera footage, proceed to Cloud P2P setup.

The connection page displays a countdown timer.

6. After connecting, Enter the cameras username (clareadmin) and password (secure7) and tap ENTER.
7. Tap Start Live View.
8. Proceed to Cloud P2P setup.

Note: For camera LED light status, refer to page 2.

Access Cameras From Anywhere With Cloud P2P!

Easily View Recorded Video Footage

If you are using an NVR or a micro SD card*, you can use the ClareVision+ App to view all recorded footage.
